Requires a prescription for medication from a USA licensed doctor.

Question:

How do I get a prescription for either Hydroxychloroquine or Ivermectin? My clinic doctor in Northern Nevada was advised by his employer that he is not allowed to prescribe these medications, or he will be fired.

Answer:

1. Find an online doctor that is licensed in your state. This consultation may not be covered by your health insurance.
2. Find an independent clinic, not associated with a large company - This consultation may not be covered by your health insurance.
3. Find an independent doctor in your community.
