

A stylized, layered landscape illustration. The foreground features rolling green hills in various shades of green, with a dark brown path or streambed winding through them. On the left, there is a green tree with a brown trunk, a purple flower, and some orange foliage. A small red bird is flying in the sky above the tree. The background consists of light blue and white wavy bands representing the sky.

Know Your Environment

Micro-climates – sun exposure; heat sources; wind patterns

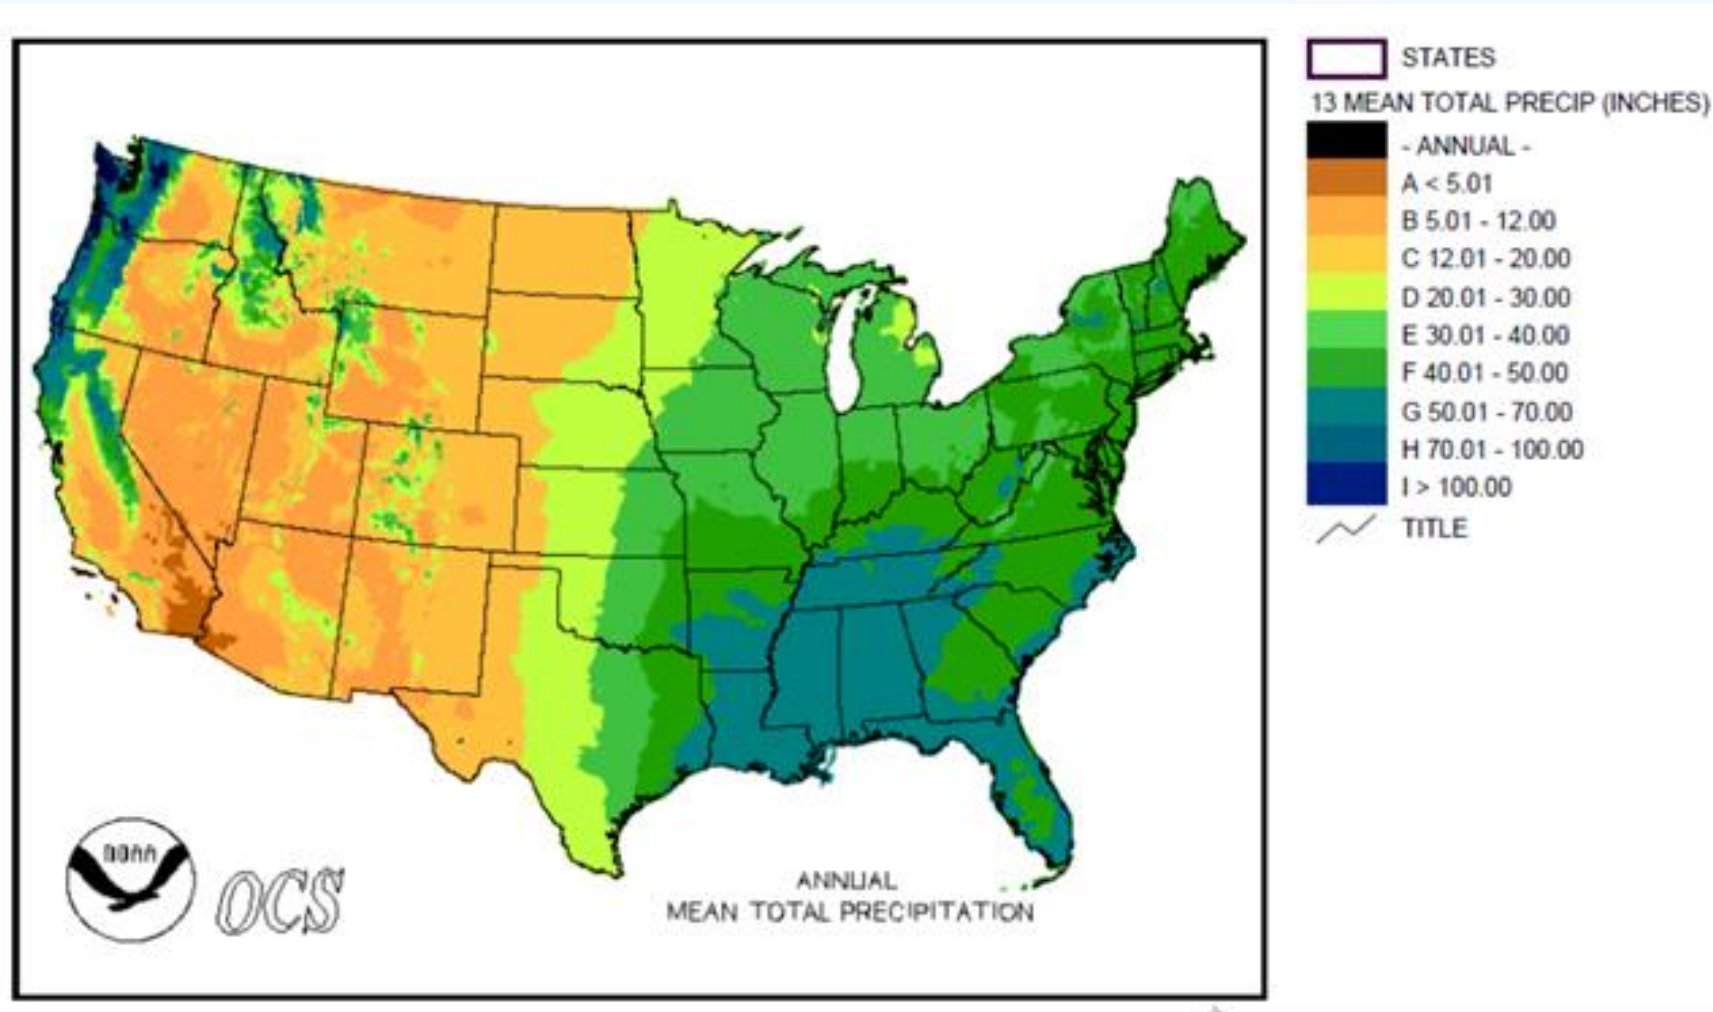

Average Annual Extreme Minimum Temperature 1976-2005

| Temp (F) | Zone | Temp (C) |
|------------|------|----------------|
| -60 to -50 | 1 | -51.1 to -45.6 |
| -50 to -40 | 2 | -45.6 to -40 |
| -40 to -30 | 3 | -40 to -34.4 |
| -30 to -20 | 4 | -34.4 to -28.9 |
| -20 to -10 | 5 | -28.9 to -23.3 |
| -10 to 0 | 6 | -23.3 to -17.8 |
| 0 to 10 | 7 | -17.8 to -12.2 |
| 10 to 20 | 8 | -12.2 to -6.7 |
| 20 to 30 | 9 | -6.7 to -1.1 |
| 30 to 40 | 10 | -1.1 to 4.4 |
| 40 to 50 | 11 | 4.4 to 10 |
| 50 to 60 | 12 | 10 to 15.6 |
| 60 to 70 | 13 | 15.6 to 21.1 |

Know Your Environment

Local weather – Supplement “effective precipitation”

Irrigation Requirements

- Water supports vital plant functions:
 - Photosynthesis
 - Support / rigidity / turgor
 - Transpiration
 - Transportation of nutrients and sugars to various plant parts here
- Vegetables Need at Least 1" of Water per Week
 - 65 gallons per 100sqft
 - 27,000 gallons per acre
- Overwatering is as bad as underwatering

Irrigation Requirements

Soil Drainage Patterns

Water Extraction Patterns

Irrigation Requirements

HOW OFTEN DO YOU NEED TO WATER YOUR GARDEN?

| Plant | When to Water | Gallons Needed |
|--|---|---|
|  Bell Peppers | Steady watering from flowering through to harvest time | 2 per week |
|  Cucumber | Frequently during flower and vegetable development | 1 per week |
|  Tomato | During the first month after transplanting, and when flowers/fruit form | >1, twice per week |
|  Zucchini | Frequently, at all stages of growth | 1 per week |
|  Corn | When tassels form on cobs, and cobs begin to swell | 2 at each stage listed |
|  Basil | Regularly, keeping soil moist | Water as needed |
|  Kale | Regularly, keeping soil moist | Water as needed |
|  Potatoes | As soon as potatoes begin to form, and again when they are the size of marbles | 2 per week |
|  Peas | When flowers form, during pod formation, and during picking | 2 per week |
|  Carrots | During root development, and again before soil is completely dry | 1 during root development, then 2 every 2 weeks |
|  Lettuce | Water frequently at all stages of growth | 2 per week |
|  Onions | Infrequently under normal conditions, or during early stages during dry weather | 1/2 - 1 per week if soil is dry |
